Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The applicant is advised to perfect the Japan 2003-377084 and claim metes and bounds of absorbent in order to position this application for allowance.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Evidence that claim 1 fail(s) to correspond in scope with that which applicant(s) regard as the invention can be found in the reply filed 11/03/2009. In that paper, applicant has stated an absorbent, and this statement indicates that the invention is different from what is defined in the claim(s) because it is unclear as to what structurally constitutes an absorbent. The structure of the "absorbent" has not been recited as to establish the metes and bounds of "an absorbent".

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakanishi et al. (PGPUB 2004/0229093).

Claim 1-5, 8, 13-14: Nakanishi teaches a fuel cell (anode and cathode) system with water absorbing members (70) arranged outside the oxidizing gas conduits (36). These members are attached to a roller (74) and rotated to approach and depart from the electrode [Abstract, Figure 3]. The absorbent is rotated to the other side of the roller to be dried [Figure 4].

Claim 6-7, 9-12: A controller for the rotating wheel relies on level of moisture (humidity) [Paragraph 10]. This controller has a control unit that stores data [Paragraph 27]. The controller controls valve [Paragraph 31]. The controls also comprise voltage sensors and are therefore capable of detecting temperature [Paragraph 35].
